

Subject Index - Vol. 19 (1974)

- Acid, ascorbic, effect on levels of lipids and glycosaminoglycans in weanling rat aorta, 191
- Acid mucopolysaccharides, in pig aortic endothelium, passage-restricting role, 215
- Amino acid composition, human aortic elastin, 287
- Aorta, atheromatosis, identification by skin biopsy, 449
- , atherosclerosis in the Finnish population, study of a series of violent deaths, 221
- , differences of lamellar structure between birds and mammals, 47
- , mural thrombosis and atherogenesis, 543
- , phospholipid metabolism in, 441
- , pig, passage-restricting role of AMPS in endothelium, 215
- , rabbit, effect of hypoxia, 201
- , rat, activity of alkaline phosphatase in rats with post-reproduction arteriopathy, 29
- , —, weanling, effect of ascorbic acid and methionine on levels of lipids and glycosaminoglycans, 191
- Aortic cholesterol-esterifying activity, changes in rabbits fed cholesterol, 253
- Apolipoproteins (ApoA, ApoB, ApoC), procedure for establishment of composition and concentration of — from normal human plasma, 501
- Arterial lesions, differences in spider and rhesus monkeys, 75
- Arteriopathy, rat, activity of alkaline phosphatase in aorta and serum, 29
- Arteriosclerosis, identification by skin biopsy, 449
- , with metastatic calcification in Corriedale sheep in Punjab, 521
- Artery, coronary, *post mortem* examination in sudden coronary death patients, 529
- Atherogenesis, in coronary arteries and aorta, 543
- Atherosclerosis, aortic and coronary, in the Finnish population, study of a series of violent deaths, 221
- , coronary, comparison of visual grading and angiographic technique, 231
- , experimental, rate of collagen synthesis in canine arteries, 13
- , lesions in man, morphology of cholesteryl ester-rich inclusions, 555
- measurement, 347
- and oxygen diffusion, 135
- , pathogenesis of, 353
- , rabbit, regression, treatment with low-fat diet, hyperoxia and hypolipidemic agents, 259
- , serum cholesterol esterification in species resistant and susceptible to —, 297
- Baboon (*Papio ursinus*), fatty acid composition of cholesteryl esters, phospholipids and triglycerides in —, 469
- Blackgram, hypolipidaemic action of polysaccharide, 315
- Blood coagulation studies on dietary prevention of ischaemic heart disease, 87
- Blood lipids, in patients with hypertriglyceridaemia, effect of combined treatment with phenformin and stanazolol on —, 153
- Blood plasma, cholesteryl ester metabolism in — of various animal species, 393
- Body weight changes, effect on plasma lipids in patients with primary hyperlipoproteinemia, 477
- Calcification, human aortic elastin, 287
- , metastatic, and arteriosclerosis, in Corriedale sheep in Punjab, 521
- Canine atherosclerosis, increased arterial collagen synthesis in experimental —, 13
- Cholesolvin, clinical and metabolic effects of pentaerythritol tetranicotinate in combination with —, 407
- Cholesterol, accumulation in various tissues of rabbit, exposed to various serum cholesterol levels, 561
- Cholesterolaemia, pigeons, familial, 307
- Cholesterol esterase, aortic, in rabbits, 459
- Cholesterol-esterifying activity, aorta, changes in cholesterol-fed rabbits, 253
- Cholesterol feeding, effect of duration of — on aortic cholesterol esterase in rabbits, 459
- Cholesterol metabolism, role of dietary triglycerides, 327

- Cholesterol, plasma concentration in normal and cholesterol-fed rabbits, 369
- Cholesteryl esters, fatty acid composition in — of baboon, 469
- , metabolism in liver and blood plasma of various animal species, 393
- Cholesteryl ester-rich inclusions in atherosclerotic lesions in man, 555
- Clofibrate, clinical and metabolic effects of pentaerythritol tetranicotinate in combination with —, 407
- , comparison with halofenate in isolated rat hepatocytes, 381
- , effect of sodium salt and ethyl ester on fat-mobilizing factor in serum, 463
- Coronary arteries, human, lipid metabolism in —, 35
- , mural thrombosis and atherogenesis, 543
- , *post mortem* examination in sudden coronary death patients, 529
- Coronary atherosclerosis, comparison of visual grading and angiographic technique, 231
- , in the Finnish population, study of series of violent deaths, 221
- Coronary death, acute, mural platelet microthrombi and major acute lesions of main epicardial arteries, 529
- Diabetic retinopathy, influence of hypophysectomy on platelet aggregation, 277
- Diet, high-cholesterol-high triglyceride diets in pigs, effect on serum lipoproteins, 485
- Elastin, human aortic, amino acid composition and calcification, 287
- Endothelium, pig aorta, passage-restricting role of AMPS, 215
- Fat tolerance test, intravenous, for estimation of hyperlipaemias, 493
- Fibrinolytic activity, in patients with hypertriglyceridaemia, effect of combined treatment with phenformin and stanazolol on —, 153
- Halofenate, comparison with clofibrate in isolated rat hepatocytes, 381
- , effectiveness of two dosage forms and two dose schedules, 417
- Heart disease, ischaemic, blood coagulation studies on dietary prevention, 87
- β -Hydroxy- β -methylglutarylcoenzyme A reductase activity in allylamine-fed rats, 185
- Hyperbetalipoproteinaemia, familial, effect of D-thyroxine on metabolism of cholesterol in —, 103
- Hyperlipaemia, intravenous fat tolerance test for estimation of —, 493
- Hyperlipoproteinaemia, patients with primary —, effect of body weight changes on plasma lipids, 477
- Hyperlipoproteinaemias, classification, 349
- Hyperoxia, effect on regression of atherosclerosis in rabbit, 259
- Hypertension, pre-existing, rats, effect on isoproterenol-induced myocardial infarction, 161
- Hypertriglyceridaemia, effect of combined treatment with phenformin and stanazolol on blood lipids and fibrinolytic activity in patients with —, 153
- Hypolipidaemic action of polysaccharide from blackgram, 315
- Hypolipidaemic agents, effect on regression of atherosclerosis in rabbit, 259
- Hypolipidaemic treatment, effect on regression of cutaneous tuberous xanthomas, 1
- Hypophysectomy, influence on platelet aggregation in diabetics, 277
- Hypoxia, rabbit, effect on vascular connective tissue and skin, 201
- Infarction, myocardial, isoproterenol-induced, rats, effect of pre-existing hypertension, 161
- Lipid deposits, in ageing human arteries, tendons and fascia, 429
- Lipid metabolism in perfused human non-atherosclerotic coronary arteries and saphenous veins, 35
- Lipid response to dietary changes in fat and carbohydrate, 119
- Lipids, effects of ascorbic acid and methionine on the levels of — in weanling rat aorta, 191
- Lipoprotein metabolism in man, effect of oxandrolone on —, 337
- Lipoproteins, determination in tissue fluid of vessel wall, 243
- , low-density — of cholesterol-fed rabbits, 139
- Liver, cholesteryl ester metabolism in — of various animal species, 393
- Methionine, effect on levels of lipids and glycosaminoglycans in weanling rat aorta, 191
- Monkey, spider and rhesus, comparison of arterial lesions and serum lipids, 75
- Nicotinic acid, comparison with clinical and metabolic effects of pentaerythritol tetranicotinate (Perycit), 61
- [³²P]Orthophosphate, incorporation into

- phospholipids of rat plasma and aorta, 441
- Oxandrolone, effect on lipoprotein metabolism in man, 337
- Oxygen diffusion and atherosclerosis, 135
- Pentaerythritol tetranicotinate (Percyt), clinical and metabolic effects, combination with cholestin or clofibrate, 407
- , (Percyt), clinical and metabolic effects, comparison with nicotinic acid, 61
- Phenformin, effect of combined treatment with stanazolol on blood lipids and fibrinolytic activity in patients with hypertriglyceridaemia, 153
- Phospholipids, fatty acid composition of — in baboon, 469
- Phospholipids, metabolism in aorta, 441
- Pig, aortic endothelium, passage-restricting role of AMPS, 215
- , serum lipoproteins in — on high-cholesterol-high-triglyceride diets, 485
- Pigeons, familial cholesterolaemia, 307
- Plasma, normal human, composition and concentration of apolipoproteins in very-low and low-density lipoproteins, 501
- Plasma lipids, effect of body weight changes on — in patients with primary hyperlipoproteinaemia, 477
- Platelet aggregation, relation to diabetic retinopathy, influence of hypophysectomy, 277
- Rabbit, aortic cholesterol esterase in —, 459
- , cholesterol-fed, changes in aortic cholesterol-esterifying activity, 253
- , —, low-density lipoproteins, 139
- , effect of hypoxia on vascular connective tissue and skin, 201
- , mode of cholesterol accumulation in various tissues, of — with prolonged exposure to various serum cholesterol levels, 561
- , plasma cholesterol concentration in normal and cholesterol-fed —, 369.
- , regression of atherosclerosis, treatment with low-fat diet, hyperoxia and hypolipidaemic agents, 259
- Rat, activity of alkaline phosphatase in the aorta and serum, 29
- , allylamine-fed, hepatic β -hydroxy- β -methylglutaryl coenzyme A reductase activity, 185
- , arteriosclerotic and non-arteriosclerotic, effect of pre-existing hypertension on isoproterenol-induced myocardial infarction, 161
- , effect of ascorbic acid and methionine on levels of lipids and glycosaminoglycans in aorta of weanling —, 191
- , isolated hepatocytes, comparison of effects of clofibrate and halofenate, 391
- Saphenous veins, human, lipid metabolism in —, 35
- Serum, fat-mobilizing factor in —, effect of sodium salt and ethyl ester of clofibrate, 463
- Serum cholesterol, esterification, in species resistant and susceptible to atherosclerosis, 297
- , levels, exposure to various —, mode of cholesterol accumulation in various tissues of rabbit, 561
- Serum lipids, differences in spider and rhesus monkeys, 75
- Sheep, Corriedale — in Punjab, arteriosclerosis with metastatic calcification, 521
- Skin biopsy, diagnostic test for identification of arteriosclerosis and aortic atheromatosis, 449
- Stanazolol, effect of combined treatment with phenformin on blood lipids and fibrinolytic activity in patients with hypertriglyceridaemia, 153
- Thrombosis, mural, and atherogenesis in coronary arteries and aorta, 543
- D-Thyroxine, effect on metabolism of cholesterol in familial hyperbetalipoproteinaemia, 103
- Triglycerides, dietary, role in cholesterol metabolism, 327
- , fatty acid composition of — in baboon, 469
- Vessel wall, preparation of tissue fluid and determination of lipoproteins, 243
- Xanthomas, cutaneous tuberous, regression by hypolipidaemic treatment, 1
