

SUBJECT INDEX

VOL. 1 (1961) — VOL. 2 (1962)

- ABO blood groups, and gastric acid secretion(2) 326
 — and myocardial infarction(2) 325
 ACTH and myocardial infarction . . .(1) 363
 Aconitase activity, of human aortas . . .(2) 8
 Activity, physical, and coronary insufficiency in rabbits(1) 171
 — and coronary occlusion in man . . .(1) 16
 — and glucose, lactic acid and fatty acid content of human blood . . .(1) 170
 — and myocardial infarction in rabbits(1) 351
 Adrenalin, and atherosclerosis(2) 384
 — and bloodclotting time(1) 269
 — and clearing(2) 385
 — and coagulants in experimental myocardial necrosis(2) 296, 302
 — and free fatty acids(1) 269
 — and lipoprotein α/β ratio(2) 383
 — and myocardial necrosis . . .(1) 353; (2) 302
 — and serum cholesterol(2) 383
 — and weight of liver, heart and testes(2) 384
 Adrenalin sensitivity and atherosclerosis(2) 289
 Aldolase activity of human arteries(2) 5
 Allergic reaction and myocardial infarction(1) 353
 Aminopeptidases of the rabbit aorta wall(1) 114
 Aneurysma dissecans, and aortic rupture in the turkey(1) 75
 — and atherosclerosis in the turkey . . .(1) 78
 — See Marfan syndrome
 Angina pectoris and myocardial infarction(2) 328
 Announcements(2) 1, 231, 499
 Aorta cell cultures, and cholesterol feeding(1) 359
 —, cholesterol feeding and tobacco smoke(1) 359
 —, growth and degree of atherosclerosis(1) 230
 —, meaning and restrictions(1) 360
 —, morphology in various media(1) 233, 237, 359
 —, technique(1) 229
 Aortae, incubation buffers(2) 478
 Aortic rupture, in the fowl(1) 194
 — in the turkey(1) 75
 Arteriosclerosis, animals(1) 367; (2) 153
 —, description(2) 154
 —, fat and cholesterol distribution(2) 154
 Arteritis, pulmonary and *Crotalaria spectabilis* seeds(2) 482
 Ashkenazi, coronary atherosclerosis(2) 270
 Atherogenesis, focal concept(2) 418
 Atheroma, aortic, microscopic features,(1) 3
 — — —, Duguid(1) 8, 15, 71, 222, 270;
(2) 233
 —, definition(1) 6
 —, spontaneous and experimental(1) 27, 189
 —, ulceration, with low-protein diet . . .(1) 97
 —, vascularization(1) 283
 — and vessel wall metabolism(1) 303
 Atherosclerosis, animal, experimental . . .(1) 374
 — and human . . .(1) 93, 364, 376, 379; (2) 156
 —, regression(1) 377
 —, aortic, and coronary disease(1) 16
 — and coronary, in myocardial infarction(2) 79
 —, aortic, coronary and cerebral — and age(2) 80
 —, arterial wall injury(1) 381
 —, calibre of artery(1) 15
 —, carbohydrate metabolism(2) 165, 171
 —, coronary, See Coronary atherosclerosis
 —, definition(1) 7, 26
 —, diabetes and hypertension(2) 82
 —, experimental, and auto-immunization(1) 169
 —, lipid accumulation(2) 282
 —, lipogenic theory(1) 367, 374
 —, location and body build(2) 163, 170
 — and metabolic defects . . .(1) 370; (2) 165, 258
 — and physiosclerosis, gross anatomy . . .(2) 25
 —, sex and hypertension(2) 81
 —, stages(1) 37, 212, 241
 — and xanthomatosis(2) 156
 Auto-immunization and experimental atherosclerosis(1) 169
 Biosynthetic activity and tracer incorporation(2) 394
 Body build, and location of atherosclerosis(2) 163, 170
 — and serum lipid level(2) 162
 Bridge tournament, serum cholesterol and lipoprotein levels(2) 63
 Calcification, intimal(1) 7
 —, medial, See Mönckeberg's sclerosis
 — and alkaline phosphatase(1) 106
 Calcified plaques, and developmental structural deficiencies(2) 419
 — and mechanical stress(2) 421
 —, preferential sites(2) 417
 Carbohydrates, in diet, See Dietary carbohydrates
 —, metabolism of — and atherosclerosis(2) 165, 171
 Carbonic anhydrase activity of human aorta(2) 20
 Carboxyl esterases of the aortic wall(1) 111; (2) 12
 Carotid artery injury and lipid infiltration(2) 351

- Cephalin clotting time of plasma, determination (2) 89
- "Cephalin" fractions of the aortic wall (1) 39, 44
- Cerebrovascular disease, anticoagulant therapy (1) 274
- and hypertension (2) 85
- Cholesterol, of aorta and coronary arteries, in a coronary occlusion group (2) 212
- in young chicks (1) 136
- , of the aortic wall, rabbits (1) 242
- and age (2) 204
- and duration of nialamide feeding (2) 494
- and plasma phospholipid transfer (2) 134
- , spontaneous and — induced atheromas (1) 27, 93, 171
- and atherosclerosis (1) 345
- , histomorphology of — induced atherosclerosis (2) 277
- , biosynthesis, and hypercholesterolaemia (2) 395
- and hypocholesterolaemic agents (1) 345
- , inhibitor in rats (1) 162
- in muscle tissues (2) 396
- esters, in atherosclerotic tissue (1) 363
- feeding, See Dietary cholesterol
- and fibrin (2) 321
- metabolism, and anti-thyroid drugs (1) 28
- , recovery value after paper electrophoresis (2) 426
- , serum, after adrenalin administration (2) 383
- , age and atherosclerosis (1) 47, 50, 83; (2) 168, 195, 347
- and the method of blood collection (1) 87
- and blood sugar (2) 379
- and cholesterol catabolism (rats) (2) 47
- , determination, comparison of three methods (2) 382
- and diet (chickens) (1) 93
- and diet (man) (1) 82, 308
- and diet (rabbits) (1) 170
- and dietary diosgenin (2) 461
- and dietary fat (1) 308, 444; (2) 190
- and dietary protein (1) 463
- and dietary vitamins (1) 311
- and gastro-intestinal tract (2) 323
- and heart disease (1) 27, 32, 50, 82, 172, 345
- , hourly variations (2) 181
- and lipofanogen activity (1) 358
- and β -lipoproteins (2) 322
- and oestrogens (1) 189, 425
- and parenteral diosgenin (2) 467
- in short-term stress (man) (2) 63
- and thyroid hormones (1) 28, 474
- and D-thyroxine therapy (1) 250
- and tissue (1) 82
- — total values and atherogenic activity (2) 427
- — and unloading diet (chickens) (2) 150
- , standard solution, preparation (2) 375
- in tissues of immature monkeys after butterfat diet (2) 392
- α -Cholesterol, serum, parameter of atherogenic activity (2) 430
- and total serum cholesterol values (2) 428
- Cholinesterase activity of human and animal vessels (2) 14
- Chondroitin sulphates, of the arterial wall (1) 368, 386
- , relation to age and atherosclerosis (2) 40
- , isolation and identification (2) 36
- and lipid deposition (1) 70
- Chondroitin sulphuric acid metabolism, of atherosclerotic human aortas *in vitro* (2) 55
- of rat aorta, first sign of arteriosclerosis (2) 53, 252
- of the arterial wall, measurement of ^{35}S -uptake (2) 50, 277
- of rat heart and aorta, physical exercise and fat diet (2) 56
- of rat organs, relation to age (2) 51
- Clearing activity, of the aortic wall (1) 359
- , measurement (1) 149
- , plasma, and lipoprotein lipase (2) 448
- , postheparin and normal fasting (2) 440
- and total time for isolation (2) 441
- Clearing factor, and age (2) 244
- and arteriosclerosis (1) 371
- and atherosclerosis (2) 245
- and E_1 enzyme (1) 179
- and heparin (2) 443
- and lipoprotein lipase (2) 242, 250
- and thrombocytes (2) 246
- and Triton (1) 148
- Clearing substrates (2) 439
- Coagulants and adrenalin in experimental myocardial necrosis (2) 296
- Coagulation, and conglutination (1) 253
- and dietary fat (1) 269; (2) 234
- and the saturation of fatty acids (2) 236
- , serum lipids and atherosclerosis (2) 233
- and serum phospholipids (2) 237
- , activity, of the arterial wall, and atherosclerosis (2) 91
- Collagen, and elastin fragmentation (2) 228
- , metabolism in the arterial wall, age and atherosclerosis (2) 40
- Corn oil, heating, and atherosclerosis (rabbits) (2) 116
- , hydrogenation, and atherosclerosis (rabbits) (2) 196
- Coronary and aortic atherogenesis, and oestrogens (1) 96
- Coronary atherogenesis and C/P ratio (1) 97
- Coronary atheroma (1) 19, 26, 285
- and the mode of food consumption (1) 95
- Coronary atherosclerosis, in Ashkenazi (2) 270

- and thrombosis, in ischaemic heart disease (2) 84
- Coronary disease and aortic atherosclerosis (1) 16, 171
- Coronary embolism, experimental method (1) 350
- Coronary insufficiency, cholesterol feeding and over-exertion . . . (1) 171
- and oestrogens in man (1) 172
- Coronary intimal haemorrhage . . . (1) 18
- Coronary lesions, method for their location (2) 348
- Coronary occlusion and myocardial infarction (1) 16
- Coronary spasm, experimental method (1) 351
- Coronary thrombosis, and anticoagulant activity (1) 406
- , experimental method (1) 402
- *in vivo* and coagula *post mortem* . . . (2) 288
- , resolution (1) 404
- Corticosteroids, and metabolism of normal rat aorta *in vitro* . . . (2) 254
- Cortisone and lipid-P uptake of the aortic wall (1) 145
- Cortisone-glucose test and atherosclerosis (2) 176
- C/P ratio, and coronary atherogenesis (1) 97
- in essential hypercholesterolaemia (1) 321
- of lipoproteins of different density (1) 328
- of β -lipoproteins (1) 320
- after myocardial infarction . . . (1) 172, 324
- after oestrogen treatment (1) 324
- Crotalaria spectabilis*, seeds, extraction, and toxicity in rats (2) 484
- — and pulmonary arteritis in rats (2) 482
- —, toxicity, species difference . . . (2) 489
- Dehydrogenase activity of arteries . . . (2) 6, 9
- Diabetes, atherosclerosis and hypertension (2) 82
- and hypercholesterolaemia (2) 376
- Dicoumarol, and platelet adhesion . . . (1) 275
- and thrombus resolution (1) 268, 274
- , treatment, in cerebral vascular disease (1) 274
- —, after myocardial infarction . . . (1) 273
- Dietary carbohydrates and atherosclerosis (1) 94
- Dietary cholesterol, See also Post-cholesterol
- and arterial oxygen uptake (1) 417; (2) 253
- and concentration in aortic wall and plasma (2) 126, 136
- and atheromatosis (2) 195
- and experimental atherosclerosis (1) 375, 476; (2) 115
- and fibrinolytic activity (1) 406
- , iodothyronines and myocardial necrosis (1) 477
- , liver fat content and dietary diosgenin (2) 464
- and serum lipoproteins (1) 123; (2) 467
- and serum mucopolysaccharides . . . (2) 280
- in an unloading diet of chickens . . . (2) 149
- and vascular changes (1) 26, 299, 476
- , vehicle, and atherosclerosis (rabbits) (2) 115
- Dietary diosgenin and serum phospholipids (2) 466
- Dietary egg, pathological changes in the fowl (1) 191
- Dietary fat, and atherosclerosis (1) 364; (2) 309
- , (butter), and serum lipoproteins (young monkeys) (2) 388, 395
- and coagulation (1) 269; (2) 234, 243
- , fatty acid composition (2) 187
- and fatty-acid composition of serum phosphatides (1) 454
- and fibrinolytic activity . . . (1) 222; (2) 238
- and heparinoid substances in the blood (2) 235
- , hyperlipidaemia and atherosclerosis in rats and rabbits (2) 186
- and myocardial infarction (1) 353
- in the post-cholesterol phase, and atheromata (2) 471
- and serum cholesterol (1) 308, 444; (2) 190
- , serum fatty acids and atherosclerosis (2) 244
- and serum β/α -lipoprotein ratio . . . (2) 191
- and vaccinal haemagglutinin inhibition titer (2) 307
- Dietary fatty acids, and atherogenesis (2) 119
- in the post-cholesterol phase, and atheromata (2) 472
- and thrombosis (1) 370
- Dietary nialamide and aortic cholesterol (2) 493
- Dietary phosphatides and serum phospholipids (1) 121
- Dietary protein, and atherosclerosis (1) 94, 461; (2) 126
- and myocardial necrosis (1) 353
- and serum cholesterol (1) 463
- Dietary vitamins, and myocardial necrosis (1) 353
- and serum cholesterol (1) 311
- Diosgenin, absorption spectrum (2) 460
- , competition with cholesterol (2) 463
- , in the diet, See Dietary diosgenin
- , parenteral, and serum cholesterol (2) 467
- percentage in the diet, and serum cholesterol level (2) 461
- DOCA and myocardial necrosis (1) 354
- Elastase, activity of the aortic wall, and age (1) 181
- — and atherosclerosis (1) 177
- — and elastin (1) 174
- — and E₁ enzyme (1) 179
- , heparin and lipoprotein lipase . . . (2) 245
- in the pancreas (1) 178
- Elastin, amino-acid composition (1) 63
- changes, and atherosclerosis (2) 272
- complex, purification (1) 173
- and esterolytic activity (1) 117
- , formation (1) 176
- fragmentation, its significance . . . (2) 229

- , lipid component (1) 62
 —, pseudo- (1) 176
 —, spontaneous fragmentation in dog
 carotid artery (2) 223
 —, staining (2) 224, 270
 —, *a*- (1) 175
 Enolase activity of human arteries . . . (2) 7
 Enzyme activity, of the aortic wall, and
 atherosclerosis . . . (1) 363; (2) 2, 252
 — in experimental atherosclerosis in
 animals (2) 2
 Enzymes of the citric acid cycle, activity
 in normal and atherosclerotic aortas
 (2) 7
 Erratum (2) 499
 Erythrocytes between intimal foam cells
 (1) 291
 Esterase activity of normal aortas . . .
 (1) 117; (2) 13
 Esterolytic activity of the aortic wall,
 and gonadectomy (2) 496
 — and nucleic acid content (2) 498
 Estrogens, see Oestrogens
 Fat, composition of serum lipid fractions
 (1) 47
 — diet, see Dietary fat
 Fat loading, and blood coagulation . (2) 249
 —, methodical defects (2) 249
 — and serum lipid level (2) 168
 Fatty acid biosynthesis in muscle tissues
 (2) 396
 Fatty acid esterification, and albumin (2) 405
 — in aortic tissues (2) 400
 Fatty acid incorporation, in the vena
 cava (2) 409
 Fatty acids, of the aortic wall, in one-day
 -old chicks (2) 143
 — and atherosclerosis (1) 43, 82
 —, composition, in dietary fat . . . (2) 187
 — of free-range and battery hens'
 eggs (2) 140
 —, diet, See Dietary fatty acids
 —, gas-liquid chromatography . . (1) 41, 158
 —, methyl esters, preparation and deter-
 mination (2) 139
 — and the mobility of lipoproteins . (2) 109
 —, non-esterified, and carbohydrate
 metabolism in atherosclerosis . (2) 177
 —, percentage change between fertile
 egg and chick aorta (2) 144
 —, saturation, and coagulation . . . (2) 236
 —, serum, and atherosclerosis . . .
 (1) 50, 170, 438
 — and coagulability (1) 269
 —, dietary fat and atherosclerosis (2) 244
 —, heparin injection and athero-
 sclerosis (2) 244
 — in serum lipids and atherosclerosis (2) 167
 —, tissue, in immature monkeys after
 butterfat diet (2) 392
 Fatty streaks, collagen production . (1) 415
 —, lipid content (1) 413
 —, microscopic features (1) 5
 — and sclerotic plaques (1) 364, 374
 Fibrin and cholesterol (2) 321
 Fibrin film in early atherosclerotic lesions
 (2) 249
 Fibrinolytic activity, and cholesterol
 feeding (1) 404
 — and dietary fat (1) 222; (2) 238
 — in different layers of the vessel wall
 (1) 170
 —, diurnal fluctuations (1) 226
 — and heparin level (1) 408
 — and serum lipids (1) 226
 — and thrombus resolution (1) 271
 Fumarase activity of human aortas . (2) 9
 Galactose, serum, and atherosclerosis (2) 336
 Gastric acid secretion, and ABO blood
 groups (2) 326
 — and alimentary lipaemia (2) 324
 Gastro-intestinal tract, serum cholesterol
 levels (2) 323
 General adaptation syndrome and myo-
 cardial necrosis (1) 354
 Globulin fractions, serum, in various
 diseases (2) 340
 α_2 -Globulins, and S_f 20-400 lipoproteins
 (2) 109
 Glucose, serum, and atherosclerosis . (2) 173
 Glucose tolerance, age and athero-
 sclerosis (2) 174
 —, hypercholesterolaemia and athero-
 sclerosis (2) 174
 —, obesity and atherosclerosis . . . (2) 174
 Glucuronidase activity of the aortic wall
 (2) 19
 Glycolysis rate, in animal aortic tissue
 (2) 3
 Glycoproteins, of the aortic wall, iso-
 lation (1) 390
 — and arteriosclerosis (1) 371
 —, serum, and atherosclerosis . . . (2) 336
 —, in myocardial infarction . . . (1) 185
 —, in tissue, isolation (2) 345
 Gonadal hormones, See also Sex hor-
 mones
 —, hypophysis repression, and nucleic
 acids (2) 369
 — and nucleic acids in various tissues (2) 367
 Ground substance, of the arterial wall.
 (1) 372, 386; (2) 27
 —, influence of various substances (2) 29
 — change and elastin fragmentation (2) 224
 Heparin, in relation to the arterial intima
 (2) 92
 —, dietary fat and atherosclerosis . .
 (2) 235, 242
 — and fibrinolytic activity (1) 408
 —, lipoprotein lipase and elastase . . (2) 245
 — and Mg salts, anticoagulant activity
 (1) 276
 — and ^{32}P -uptake of the aortic wall (1) 145
 —, serum fatty acids and atherosclerosis
 (2) 244
 — therapy in atherosclerosis (2) 244
 — and thromboplastic activity in heart
 disease (1) 171
 — and thrombus formation (1) 268
 Hexokinase activity of human arteries. (2) 4

- Hexosamine content of the arterial wall
in atherosclerosis (2) 38
- Hurler syndrome and acid mucopolysaccharides of the aortic wall . . . (1) 391
- Hyaluronic acid content of the arterial wall, in atherosclerosis (2) 40
- Hydrocortisone, and acid mucopolysaccharides (2) 257
- and enzyme formation (2) 256
- and hypercholesterolaemia (1) 96
- 17-Hydroxycorticosteroid excretion in white and negro children (2) 148
- Hypercholesterolaemia, and cholesterol biosynthesis (2) 395
- and connective tissue repair (1) 287
- , essential, and serum lipids (1) 321
- and glucose tolerance (2) 174
- and hydrocortisone (1) 96
- in optimally compensated diabetes (2) 376
- and pancreatectomy (1) 96
- and plaque vascularization (1) 289
- and thyroid (1) 28, 95
- Hyperlipaemia, and atherosclerosis (1) 375
- , essential, and blood coagulation (2) 234
- and hyperlipidaemia (1) 47
- and plasmin inhibitors (1) 170
- and Triton (1) 149
- Hyperlipidaemia, and arteriosclerosis (1) 370
- and atherosclerosis (2) 166
- , location of atherosclerosis (2) 163
- , essential, and lipoprotein lipase (2) 248
- and hyperlipaemia (1) 47
- , idiopathic, and fatty acid composition of serum lipids (1) 50
- Hypertension, and atherosclerosis (1) 14, 96
- , renal, and coronary thrombosis (1) 171
- Hypocholesterolaemic agents, sterols (2) 459
- Hypothyroidism, hypercholesterolaemia and atherogenesis (1) 28, 95
- Insulin tolerance test and atherosclerosis (2) 176
- Ischaemic heart disease, clinical syndromes (2) 317
- , environmental factors (2) 327
- , epidemiological data (2) 318
- , pathogenesis (2) 320
- , prospective study design (2) 319
- Ketone-body level in atherosclerosis (2) 173
- 17-Ketosteroid values, in white and negro children (2) 147
- Laminarin sulphate, degraded, anti-lipaemic, anticoagulant and toxic properties (2) 315
- Lecithins, of the aortic wall, and atherosclerosis (1) 39
- , biosynthesis, (2) 406
- , fatty acids (1) 42
- , determination (1) 38, 122
- , serum, and cholesterol feeding . . (1) 124
- Linoleic acid, in CEFA of lipoproteins (1) 439
- Lipaemia and gastric acid secretion (2) 324
- Lipfanogens, serum cholesterol and atherosclerosis (1) 358
- Lipid biosynthesis, of aortic slices, from rabbits, dogs, rats and baboons (2) 403
- of the aortic wall, measurement (2) 480
- in different parts of the aorta . . (2) 402
- Lipid fractions of the aortic wall, specific radioactivity (2) 479
- Lipid infiltration after carotid artery injury (2) 351
- of aorta and coronary arteries, and age (2) 204
- in a coronary occlusion group (2) 211
- , of the arterial wall, (young chicks) (1) 136
- and atheromatosis (fowls) (1) 195
- , composition (1) 369
- , extraction . (1) 37, 319, 336; (2) 200
- and macrophages (2) 351
- and severity of atherosclerosis (2) 199
- Lipids, in elastin (1) 62
- , serum, and age (2) 161
- and atherosclerosis (1) 47, 49, 436; (2) 164
- and body build (2) 162
- and cholesterol kinetics of the aortic wall (1) 454
- , criteria for response to treatment (2) 99
- and dietary fat (rabbits) (2) 193
- and dietary fat (rats) (2) 189
- , extraction and separation (1) 47, 435
- and fat loading curves (2) 168
- , fatty acid composition and atherosclerosis (1) 438; (2) 167
- and fibrinolytic activity (1) 226
- and hypercholesterolaemia (1) 321
- , menstrual and regional differences (2) 170
- and oestrogens (1) 423
- , spontaneous fluctuations (2) 98
- Lipids, silicic-acid column chromatography (2) 200
- , tissue, separation method (2) 401
- Lipoidosis and atheromatosis in human autopsies (2) 25
- Lipolytic activity of the aortic wall and aorta mucopolysaccharides (2) 14
- Lipoprotein lipase, in adipose tissue, inhibitors (2) 444
- , elastase and heparin (2) 245
- in essential hyperlipidaemia . . . (2) 248
- , in plasma, and cations (2) 442
- , chromatography buffers (2) 440
- and clearing factor (2) 242, 250
- and fatty acid acceptor (2) 443
- and heparin injection (2) 438
- , inhibitors (2) 447
- and β -lipoproteins (2) 449
- , preparation (2) 104
- in various tissues and species . . . (2) 12
- Lipoproteins, β/a ratio, and dietary fat (rats) (2) 191
- , density and C/P ratio (1) 328
- , high density, production from S_f 20-400 (2) 111
- , hydrated density determination (2) 106
- , low density, NH_2 -terminal amino-acid composition (2) 108
- , low density, and serum lipid level (2) 169

- , metabolism in arterial tissue cultures(1) 358
- , mobility, and fatty acids(2) 109
- , serum, and atherosclerosis(1) 362
- , density class and triglyceride values(1) 342
- , three basic determination methods(2) 429
- and dietary fat (rats)(1) 454
- and dietary fat (young monkeys)(2) 388, 395
- and enzymically produced(2) 107
- , heterologous, and atherosclerosis (rabbit)(1) 241
- , α/β ratio, after adrenalin administration(2) 383
- , in short-term stress in man(2) 63
- , after D-thyroxine(1) 248
- , S_f 0-20(2) 104
- , S_f 11-20(2) 107
- , S_f 20-400, and α_2 -globulins(2) 109
- , ^{131}I , lipolysis study(2) 109
- , preparation(2) 105
- , ultracentrifugal studies(2) 107
- β -Lipoproteins, serum, and β -C/P ratio(1) 330
- and cholesterol feeding(2) 467
- , complex with heparin(1) 319
- , immunization(1) 169
- and intimal lipids(1) 91
- and intimal mucopolysaccharides(1) 69
- and lipoprotein lipase(2) 449
- , methods of isolation(1) 335
- and serum cholesterol(2) 322
- Lysolecithins in serum, fatty acid composition(1) 43
- Macrophages, blood, serum cholesterol and atherosclerosis(1) 395
- and lipids in atheroma(2) 351
- Marfan syndrome and acid mucopolysaccharides of the aortic wall(1) 391; (2) 28, 34
- Maturation, comparison of white and negro children(2) 146
- Mesenchyme reaction, universal non-specific, and arteriosclerosis(2) 57, 260
- Metaplasia of rat's bronchiolar epithelium by monocrotaline(2) 485
- Methylchlorocortisol and myocardial necrosis(1) 171
- Minerals of aorta and coronary arteries, and age(2) 206
- in a coronary occlusion group(2) 211
